

# Brain Testing App

# Why Do I Care?

- Inspired by popular daily brain games like Wordle
- Wanted a free, simple alternative
- Focus on quick, accessible challenges
- Designed for casual, everyday use
- Goal: make brain training easy and engaging

## Who Is It For?

- Students and casual users
- People who enjoy puzzles
- Users looking for short breaks

## Key User Stories

- As a user, I want quick tests so I can play in short sessions.
- As a user, I want clear instructions so I know what to do.
- As a user, I want results and stats so I can track progress.

## Success Means...

- User picks a game without confusion
- Task instructions are understood
- Feedback appears immediately
- Results make progress visible

# Early Design Cycle

Early Paper UI

Home Screen

Pattern Test

Reaction Time

# UI/UX Test Outcomes

- Navigation was mostly clear
  - Users understood the three games, but secondary options (settings and stats) needed separation
- Games started too quickly
  - The reaction game started as soon as you pressed to enter it, now it has a “push to start” section
- Reaction game also needed more precision
  - Started as a red fading to green when you need to press, now instantly changes to green when you need to press

**Pattern**  
Logic

### App Options

**Stats**  
Progress

**Settings**  
Options

- Games Section
- Random Tests
- App Options
- Stats

# Conclusion/Future Plans

## Current Strengths

- Clearer home screen hierarchy
- Three playable randomized tests
- Immediate feedback and results
- Stats and settings included

## Future Plans

- Save stats after closing the app
- Add difficulty levels
- Update brain tests
- Run more real usability tests
- Add sound feedback
